

## SC2 DRESSING

### **Description:**

SC2 is a water-based surface revitaliser for plastics, vinyl, leather, rubber and acrylic materials that creates a chemical and molecular barrier thanks to siloxanes and fluoropolymers. Its unique formula creates an incredible depth, antistatic and water-repellent effect, with a silk effect to the touch, without being greasy. SC2 is free of petroleum distillates and can therefore be applied simply and at extreme temperatures, without bleaching and releasing oily substances. Its unique feature is that it resists to acid and alkaline washes and protects from UV rays, ensuring prolonged colour retention of previously treated plastics, lights and leather for up to 5 months.

### **Directions for use:**

Spray SC2 2-3 times on a microfibre cloth with short fibres and then directly on the clean and dry surface. Apply the product properly ("Criss-Cross" method). You can reapply another layer after 20 minutes to strengthen the effect and increase colour depth. The product is fully activated after 7 hours. The product can be diluted before application up to 1:5 (1 part of product and 5 parts of water) according to the desired degree of protection.

### **Consumption:**

50ml/car

### **Warnings:**

Best performances can be achieved on a well-maintained surface. Do not apply the product on tyre tread. To handle the product follow the precautionary advice on the safety data sheet.

### **Technical Features:**

Appearance and colour: opaque white liquid  
Odour: characteristic  
pH: 6,5 ± 0,5  
Flash point: >100 °C  
Relative density: 0,99 g/cm<sup>3</sup>  
Solubility in water: soluble  
Solubility in oil: not soluble

### **Storage:**

Unopened and stored at room temperature away from direct sunlight.

### **Packaging:**
