

## SC1 SEALANT

### **Description:**

SC1 is an extraordinary quick surface sealant that creates a chemical and molecular barrier thanks to the latest and most advanced nano technology. Its unique formula creates an incredible protective and rain-proof effect, with a silky feel to the touch. SC1 is designed to be an easy-to-apply sealer, so it can be applied quickly and easily. It can be used directly on painted surfaces or treated with waxes, sealants and nano-coating, providing its performance without creating build-ups.

### **Directions for use:**

Spray SC1 once or twice directly on the clean, dry surface (40x40 cm at a time). Apply it carefully (with a 'criss-cross' technique) and wipe again with another medium/long fibred microfibre cloth with circular movements to remove any excess until you reach a glass surface. The product is fully activated after 7 hours from application and is able to resist both acids and alkalis.

**Caution:** the best performance is obtained with a completely decontaminated and clean surface with H2O at least every 3 washes.

### **Consumption:**

50ml/car

### **Warnings:**

The best performance is obtained with a completely decontaminated and clean surface with H2O at least every 3 washes.

To handle the product follow the precautionary advice on the safety data sheet.

### **Technical Features:**

Appearance and colour: slightly amber liquid

Odour: characteristic

Flash point: >23°C

Relative density: 0,78 g/cm<sup>3</sup>

Kinematic viscosity: 3,05 mm<sup>2</sup>/s

Solubility in water: not soluble

Solubility in oil: soluble

### **Storage:**

Unopened and stored at room temperature away from direct sunlight.

### **Packaging:**
